לובליה 'ריביירה'

Rounded mound plant with masses of big single flowers. The plant grows up to 15. Usually grown as an annual, Native to South Africa. Moon series Lobelias are best planted in moist, well drained, fertile soil, under full sun or in partial shade. During hot spells it may partially die back, but will revive and re-bloom as weather cools; in subtropical regions plant it in the winter. This is an excellent choice for borders, beds, .rock gardens, crevices, and hanging baskets
